Secure Identity Access

Okta Solutions—Knowledge OnTAP Professional Services Overview

Architecture , Design and Implementation of
 Single Sign-on for SaaS and On Premise Applications
 Identity management for SaaS and on premise applications
 Custom Development and Integration

Okta Solutions—Knowledge OnTAP Professional Service Offerings Summary

Access Management Services

Okta SmartStart Service offerings – Planning and Deployment of Okta solution offerings Identity, Access and Mobility management for both SaaS and on-premise applications

Single sign-on Configure and Customise Federated SSO (Single Sign On) for On premise enterprise and Cloud based SaaS Applications (Secure Web Authentication (SWA), Open ID Connect and Oauth, SAML, WS-Fed, WS-Trust etc.)

Social Authentication

Leveraging Social Identity provider(s e.g. Facebook, LinkedIn) for user authentication, thus eliminating the need to store an additional username and password for that user

Custom authentication logic to support Social Authentication provider standards like OAuth 2.0, OpenID etc.

Adaptive access Control using multi-factor authentication (MFA)

Enable and Configure Strong Authentication capabilities based on enterprise application risk profiles and compliance needs

Design, Configure and Customise On Premise MFA for Enterprise Applications

API Security Services

Design and implementation of Okta API access management components with enterprise COTS and standards based custom API's for access management

Identity Management Services

User Identity Lifecycle services focussed offerings

User (de) Provisioning, Password Management for SaaS and On Premise Enterprise applications

Provide end to end Solution for just-in-time and delegated user identity lifecycle management

Design, Build & Implement custom connectors and APIs supporting System for Cross domain Identity Management (SCIM) standards for on premise identity lifecycle management for On premise enterprise COTS and Custom applications

On-boarding new users through a Social Provider like Facebook, LinkedIn etc.

Provide framework to orchestrate, mediate and transform security standards from SCIM to SPML and / or vice versa

Design & integrate custom Microsoft Active Director and / or LDAP attributes

Universal Directory Configuration for enterprise application integration

Enable organizations to achieve consolidated user identity governance view

Capturing the Social Profile attributes from a Social Provider user and storing those attributes in Okta Universal Directory

Custom Development and Integration

Design and Development of Enterprise portals (Custom branding and UI look and feel) end User Portal and integration with Okta solution offerings for both enterprise internal users and B2C, B2B and other user types

Customized Portal UI to redirect unauthenticated users to an organization specific login page, Search page and layout customization

Customized health check dash boarding for Okta endpoint monitoring

Customized Email Notifications and Templates for end user and enterprise application and Infrastructure Administrator support team (s)

Same experience for mobile and browser plug-in

Security Event Logging and Management – integration with on-site or SaaS SIEM applications (e.g. Splunk)
